

ROLLOVER PREVENTION SAFER JOURNEYS WORKSHOP

OUR GOAL IS THAT AFTER THE WORKING DAY IS OVER WE WANT TO SEE EVERY TRUCK DRIVER IN NEW ZEALAND RETURN HOME SAFELY.

Knowing how to manage your truck and your load is an important part of being a professional truck driver. Around a third of heavy vehicle crashes in New Zealand involve a rollover and nationally our statistics on rollover are worse than comparable countries. Almost all of these crashes are preventable.

The Road Transport Forum, the NZ Transport Agency and your local transport association would

like to invite you and your colleagues to organise or attend a workshop on preventing truck rollover and improving road safety. You will get an in-depth understanding of what causes truck rollover and the simple steps you can take to prevent it.

Anyone who works in the transport industry, in any role, will benefit from this workshop - it could help you save a life in the future.
